

Signs

The building has two designated sign locations on the front, but that faces west. These sign locations will be used. It is noted that CLM, according to the City Code allows for 300 sf sign on a pole, and 300 sf signage on the building. Since the CUP application is for a Sexually Oriented Business and the size of the sign could be a noted point of contention the Applicant requests only a 200 sf sign on the building and on a pole.
